Summary

AI Engineer specializing in Generative AI, large language model (LLM) application development, and retrieval-augmented generation (RAG) systems. Skilled in designing production-ready agentic workflows using LangChain, LangGraph, and vector databases. Experienced in building and deploying scalable AI solutions that translate complex concepts into measurable real-world impact.

Experience

Developer Intern

May 2024 – July 2024

Salesforce

Remote, India

- Engineered reusable Lightning Web Components (LWC) in JavaScript and Apex, improving UX across 3 CRM modules and reducing manual data-entry time by 40% through Salesforce Flow automation.
- Integrated REST APIs to synchronize data across 2 third-party platforms, collaborating with product and QA teams to deliver 5 UI/UX improvements within a 10-week agile sprint cycle.

Artificial Intelligence Intern

Oct 2023 – Nov 2023

PwC India

India

- Architected 6 Power BI dashboards for the Strategic HR Intelligence Suite using DAX and Power Query, reducing reporting time by 30% for senior HR leadership.
- Constructed ETL pipelines to clean and transform datasets from 4 departments, enabling accurate downstream KPI forecasting and data-driven decision-making.

Projects

Codebase Q&A Assistant

LangChain, LangGraph, Gemini API, ChromaDB, FastEmbed [[GitHub](#)]

- Designed an agentic RAG system for natural-language querying over GitHub repositories using LangGraph and Gemini, supporting 4+ languages with 1,000+ code chunks indexed in ChromaDB via FastEmbed.
- Built an autonomous codebase search tool that improved retrieval precision by 35% and reduced LLM hallucinations by 30%, validated through structured test-case evaluation.

RBI Compliance Bot

LangChain, Gemini API, FAISS, Python, Streamlit [[GitHub](#)]

- Developed a PDF-based RAG assistant for querying RBI circulars; indexed 500+ document chunks with FAISS and generated department-specific actions for Compliance, IT, and Legal teams.
- Cut manual regulatory review effort by an estimated 50% through structured response generation and semantic document retrieval across 3 department workflows.

Bugg – Voice Assistant

Python, Keras, NLP, SpeechRecognition, Gemini API [[GitHub](#)]

- Delivered a voice assistant supporting 20+ commands via a Keras intent classifier trained on 500+ utterances, with Gemini API fallback for open-ended queries.
- Integrated 5 automation features (weather, alarms, search, music, reminders) via REST APIs with sub-200ms latency in hybrid offline/online execution mode.

Skills

Languages & Databases: Python, C++, SQL, JavaScript, MongoDB, ChromaDB, FAISS

AI / ML: TensorFlow, PyTorch, Keras, Scikit-learn, NLTK, Transformers, NLP, Neural Networks

Generative AI & LLMs: LangChain, LangGraph, Gemini API, RAG, FastEmbed, MCP, LangSmith, Prompt Engineering, Agentic Workflows

Web, DevOps & BI: Node.js, Express.js, REST APIs, Streamlit, Docker, Git, Power BI, DAX, Power Query, ETL

Education

B.Tech in Computer Science and Engineering

Aug 2021 – May 2025

Amrapali University

Haldwani, Uttarakhand, India

- Relevant coursework: Machine Learning, Deep Learning, NLP, Data Structures & Algorithms, Database Management Systems, Computer Networks.

Certifications & Awards

- Amrapali Merit Award – Topper 2025** (July 2025) – Ranked 1st in the CSE cohort at Amrapali University across all semesters.
- Sparktahn Winner – AI Shopping Assistant** (Aug 2024) – Recognized by Converge (@Walmart) for an AI-powered shopping assistant with end-to-end LLM integration.
